Polyclip structure #1:
   → Use <u>two</u> colors of clips
   → Each clip can only bond to two other clips
   → Terminal (end) clips will only bond to one other clip
   → No two clips of the same color can bond

Polyclip structure #2:
   → All clips must be of the same color
   → Terminal (end) clips will only bond to one other clip
   → 3 of the clips can have a 3rd bond to three other clips

Polyclip structure #3:
   → Use <u>two</u> colors of clips
   → Each clip can only bond to two other clips of the same color except for
      3 of the clips
   → Terminal (end) clips will only bond to one other clip

Polyclip structure #4:
   → All clips must be of the same color
   → Terminal (end) clips will only bond to one other clip
   → Each clip can only bond to two other clips

Polyclip structure #5:
   → All clips must be of the same color
   → Terminal (end) clips will only bond to one other clip
   → Each clip can only bond to two other clips except for 3 of the clips
   → Create two such polyclip structures and connect them accordingly

Polyclip structure #6:
   → Use <u>two</u> colors of clips
   → Each clip can only bond to two other clips
   → A clip can bond to any other clip regardless of color
   → Terminal (end) clips will only bond to one other clip
